

Safari IOS (iPhone/IPAD)- Session Expired Error

A browser cache stores copies of web pages you visit which allow the pages to load faster. Clearing the cache helps keep pages updated with the correct information. This is likely what is causing our ticketing site to think your session has expired from a previous visit (online ticketing only allows 10 minutes to make a purchase).

In MOST CASES, CLOSING SAFARI COMPLETELY AND THEN RESTARTING YOUR DEVICE WILL WORK!

IF the problem continues you may follow these 3 steps to fix the issue

1- SELECT SETTINGS FROM HOME SCREEN

2- SELECT SAFARI IN SETTINGS

3- SELECT CLEAR HISTORY & WEBSITE DATA
